\$ The solar industry has invested **\$928.07 million** in Washington, including **\$134.84 million** in 2021

More information about solar energy in Washington⁴

- The Adams Nielsen solar project has the capacity to generate 19.2 MW of electricity -- enough to power over 1,839 Washington homes.
- There are more than 70 schools across the state of Washington that have already gone solar. These schools have a combine capacity of more than 1.04 MW, enough to power 105 homes.
- Washington is a growing community solar market with more than 30 community solar projects already in the state. In 2018, A and R Solar installed two of the largest such projects, Benton County PUD at 75 kW and Clark County PUD at a combined 319 kW across its five arrays.

Solar Companies in Washington

The Solar Energy Industries Association[®] (SEIA) is leading the transformation to a clean energy economy, creating the framework for solar to achieve 30% of U.S. electricity generation by 2030. SEIA works with its 1,000 member companies and other strategic partners to fight for policies that create jobs in every community and shape fair market rules that promote competition and the growth of reliable, low-cost solar power. Founded in 1974, SEIA is the national trade association for the solar and solar + storage industries, building a comprehensive vision for the Solar+ Decade through research, education and advocacy.
