SEIA members at our premium levels have access to high-level resources, networking opportunities, event discounts, policy-setting, and more. Below is a brief breakdown of the Watt Membership.

Your company will receive the following benefits as a Watt Member:

Watt level SEIA members have access to deep discounts to SEIA and Solar Power Events, a dedicated account manager that helps them navigate their relationship with staff experts, and participation on a variety of committees and working groups, including Codes & Standards, PURPA, and Community Engagement.

Participation in 1 of 6 Divisions:

- Distributed Generation (DG)
- Energy Storage (ES)
- Manufacturing (MFG)
- Solar Heating & Cooling (SHC)
- Solar Services & Consumers (SSC)
- Utility-Scale Solar Power (USP)

Invitation to SEIA Member Lobby Days

Ability to Run and Vote for SEIA Division Chairs and Director Positions on SEIA Board

Access To:

- SEIA Logo & Member Directory Listing
- SEIA Sphere & Website Resources
- SEIA Solar Tax Manual
- Solar Array Newsletter
- Members-only Webinars & Presentations
- Solar Advocacy Toolkits
- Watt-level Working Groups
- Major Solar Projects List & SEIA Research
- Premium Members-only Webinars and events
- Premium-level Affinity Programs

Discounts For:

- Solar Power International (SPI) & Regional Solar Power Events
- Exhibiting at SPI & Regional Solar Power Events
- SEIA Events & Workshops
- U.S. Solar Market Insight Report Subscriptions
- EverBlue Job Training & SEIA Job Board Postings

Watt Level Access to SEIA Working Groups

CODES & STANDARDS WORKING GROUP (BI-WEEKLY): This group focuses on development and revision of Building Codes and Product Standards, as well as fire safety, to ensure the continued expansion of solar-friendly technical market requirements. It proactively engages with streamlining testing and certification requirements and the advancement of respected industry wide objectives for increased market credibility and growth.

COMMERCIAL & INDUSTRIAL WORKING GROUP (MONTHLY): The C&I Working Group is focused on expanding solar deployment opportunities in the commercial and industrial and non-profit sectors through financial innovations, standardization of project documents, education and outreach. The Working Group continues, in part, the work of the SEIA Finance Initiative which focused on commercial PACE and other financial tools to overcome relevant barriers and reduce unnecessary transaction costs.

COMMUNITY ENGAGEMENT WORKING GROUP (MONTHLY): The Community Engagement Working Group (CEWG) provides a venue for SEIA member companies to share and to improve best practices for ensuring a diverse company workforce, encourage access of solar to low income customers and to develop and implement new community outreach initiatives.

DG PERMITTING REFORM WORKING GROUP (MONTHLY): The DG Permitting Working Group coordinates industry efforts to improve the process of permitting, inspection, and interconnection for customer-sited PV. Working group members engage with external stakeholders including code officials, policymakers, and other advocacy organizations to dramatically reduce the cost of deploying distributed PV systems.

MOUNTING SYSTEMS MANUFACTURING WORKING GROUP (MONTHLY): The working group represents all PV mounting and racking segments covering system installation locations and applications including residential, commercial and utility scale projects on steep slope, low slope (flat roof) and fixed and tracking ground mount systems; working closely with SEIA’s Codes & Standards Working Group. *Open to only members of mounting and/or racking companies.

OPERATIONS & MAINTENANCE WORKING GROUP (MONTHLY): Solar system and plant owners, operators and service providers want to optimize for plant performance, customer satisfaction, profit and long-term performance sustainability. As a critical segment in the solar value chain, the newly formed Operations & Maintenance Working Group will work on issues unique and critical to service providers and organizations involved in this activity.

PUERTO RICO WORKING GROUP (MONTHLY): This group focuses on Puerto Rican solar deployment, including market development, disaster recovery, and grid resiliency. The Working Group continues, in part, the work that SEIA initiated in 2017 in response to Hurricane Maria.

PURPA WORKING GROUP (WEEKLY): This group is dedicated working on PURPA (Public Utility Regulatory Policies Act) issues at the state and federal levels.

PV RECYCLING WORKING GROUP (WEEKLY): The group examines PV Recycling structures and financing, creates PV Recycling messaging and communications, establishes the SEIA national PV recycling program and helps to formulate responses to any PV Recycling regulations.

SOLAR QUALITY ASSURANCE WORKING GROUP (MONTHLY): The Solar Quality Assurance Working Group seeks to evaluate, develop and encourage adoption of industry best practices in solar asset design, production estimate, installation, commissioning and O&M, and contractor qualification. The group’s activities are intended to facilitate high-quality solar installations that induce consumer and investor confidence across the industry.

TRANSMISSION WORKING GROUP (AD HOC): This group is the designated forum for SEIA members to discuss electricity transmission matters, particularly issues before the FERC, including variable resources integration, open access policies, transmission planning and cost allocation issues, reactive power and other matters.
